EDUCATION

BS IN INFORMATION TECHNOLOGY
Palawan State University
2013 - 2018

EXPERIENCE

October 2019 - March 2020

SOFTWARE DEVEOPER

Cloud Panda Phils Inc. - BGC Taguig, Metro Manila

- Joined a team of developers to create a certification website using Bootstrap, jQuery, MariaDB, and CodeIgniter.
- Was assigned to bug fixing and collaborated with the team to maintain and fix issues on the existing online clearance application website.
- Managed the uploading of codes with proper commit formatting to versioning tools like Bitbucket.
- Participated in code reviews to improve the quality and efficiency of the website's code.
- Contributed to the development of an internal website application.

May 2018 - April 2019

JR. WEB DEVELOPER

International Payment Processing - Puerto Princesa City, Palawan

- Developed an internal website for customer service employees from scratch using HTML, CSS, jQuery, MySQL, and Vanilla PHP.
- Created a detailed flow chart and designed an efficient database structure for the internal website.
- Collaborated with other developers to maintain and complete various tasks and projects using the company's tech stack.
- Integrated a third-party API and was able to test the payment gateway with the assistance of a senior developer and a supervisor.
- Managed the upload of codes to Bitbucket.
